Professional Summary

As a software developer specialized in frontend development, I focus on building user-centered, responsive, and efficient web applications while ensuring they meet business requirements. I enjoy collaborating with teams to gather user needs, translate them into technical solutions, and improve system functionality, performance, and user experience. With experience in data flow, basic analytics, and system documentation, I am committed to delivering reliable, scalable, and practical solutions that align with both user expectations and business goals.

Skills

Technical Skills

- System Analysis & Requirements Gathering
- Enterprise Systems Support & Integration
- Data Flow Understanding & Data Integrity Practices
- Testing, User Acceptance Testing (UAT), and Change Management
- Reporting & Data Visualization Fundamentals
- Languages: JavaScript, TypeScript, Python
- Frameworks: React, Next.js, Node.js
- Databases & APIs: MySQL, PostgreSQL (familiar), RESTful APIs
- Tools: Git, Postman, Vercel, Figma, Adobe XD

Interpersonal / Professional Skills

- Collaborating with Stakeholders & Vendors
- Translating Business Requirements into Technical Solutions
- Documentation & System Reporting
- Problem-Solving & Troubleshooting
- Adaptability & Teamwork

Professional Experience

Igire Rwanda Organization – SheCanCode Bootcamp

Software Developer | Sept 2025 – Present

- Collaborate with team members to analyze user needs and translate them into functional UI and backend features.
- Participate in reviewing system behavior, debugging issues, and improving performance and usability.
- Contribute to testing workflows to ensure smooth feature releases and reduce user errors.

Comprehensive Staffing Resources / Comprehensive Training Center

Software Developer | Feb 2025 – Aug 2025

- Assisted in gathering and clarifying requirements for internal system features before development.
- Designed and implemented user interfaces and supported backend logic to ensure accurate data representation.
- Worked with teams to troubleshoot system issues and document system improvements.
- Strengthened communication, collaboration, and technical reporting skills.

IDA Technology

Software Developer | Dec 2023 – Jun 2024

- Supported development and improvement of internal software applications used for business operations.
- Participated in testing, debugging, and validating system behavior to ensure functionality met business needs.
- Collaborated with senior developers and trainers in system design discussions and version control workflows.
- Engaged in structured learning on data handling, system analysis concepts, and clean code practices.

Education

Bachelor of Science (Hons) in Business Information Technology

University of Rwanda — 2021–2024

Projects

Job Match Platform (CSR Project) – Assisted in data mapping, UI workflows & requirement-based implementation.

Echoes of Rwanda (Personal Project) – Applied full-stack development and interface design principles.

House Rental Platform (Team Project) – Participated in system requirements definition & database-linked UI development.

Certifications & Specialized Training

- Big Data Analytics & Visualization – AFRETEC Workshop (2024)
- Embedded Systems Programming – AFRETEC Workshop (2023)
- Software Development Competency Program – IDA Technology (2024)
- Software Engineering & Professional Skills Program – CSR (2025)

Languages

English (Fluent) | Kinyarwanda (Native) | French (Intermediate)
